We're excited to share two concept plans: one for the overall park theme and play area, and one for the skatepark. You can comment on one or both.

Park theme

The design draws on the significance of the park to mana whenua and its natural geography. The site was once the floor of the Waimea River, which flowed through lowland forest and wetlands.

What do you love about the suggested Park Story and theme for the park? _____

What would you like to see added to the story, and why? _____

What do you love about the suggested play concept and the way we propose to lay out the play equipment? _____

What would you like to see changed about the play concept and layout and why? _____

Skatepark concept plan

The skatepark will be moved forward, away from the shade of the kohekohe stand. Our skatepark user group told us a bowl and a transition area were the most important features. The concept design includes a clover bowl, a flowy transition and street features.

What do you love about the overall concept and proposed mix of features? _____

What would you like to see changed and why? _____

What, if any, comments do you have on any of the proposed features? _____
